

EXTENDED cDNAs FOR SECRETED PROTEINS

Abstract of the Disclosure

The sequences of extended cDNAs encoding secreted proteins are disclosed. The extended
5 cDNAs can be used to express secreted proteins or portions thereof or to obtain antibodies capable of
specifically binding to the secreted proteins. The extended cDNAs may also be used in diagnostic,
forensic, gene therapy, and chromosome mapping procedures. The extended cDNAs may also be
used to design expression vectors and secretion vectors.
